DETAILED ACTION

Election/Restrictions

Claim 125 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species 3 (embodiment 3) which calls for a conductive layer of a second material (a non-oxidized portion of the conductive layer) interposed between a first capacitor plate of a first material and a second capacitor plate, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 02/04/2002. Species 1 (Embodiment 1) as elected by applicant does not have and require a conductive layer of a second material (a non-oxidized portion) interposed between a first capacitor plate of a first material and a second capacitor plate.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the dielectric that includes a non-oxidized portion and an oxidized portion must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Art Unit: 2811

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19, 20, 53, 79, 81-82, 84-85, 87, 107-112 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The dielectric that includes a non-oxidized portion of a second material and an oxidized portion is not disclosed in the elected embodiment 1. Therefore, the recitation of the dielectric that includes a non-oxidized portion and an oxidized portion, wherein the non-oxidized portion includes a second material is not supported by the elected embodiment 1. Applicant is requested to point out exactly wherein the

Art Unit: 2811

application regarding the elected embodiment 1 that teaches the unoxidized portion of the metal layer 30 is a dielectric in the elected embodiment 1. In fact, in page 7, the second paragraph of the specification discloses the non-oxidized portion (unoxidized metal layer 30) and the polysilicon layer 25 forming the first capacitor plate. The unoxidized metal layer 30 is clearly a part of a first capacitor plate. Also, it is noted that metal is a conductor and should not be considered as a dielectric (a non-conductor).

Response to Arguments

Applicant's arguments with respect to claims 19, 20, 53, 79, 81-82, 84-85, 87, 107-112 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
